valerie^{objects}

valerie^{objects}

valerie_objects is an Antwerp-based design label initiated by Axel Van Den Bossche and art director Veerle Wenes, combining their professional and personal taste for all things good and beautiful.

By allowing designers, architects and artists to translate their signature style into tangible objects, valerie_objects has become a unique collection of everyday items with out-of-the-box aesthetics. These are objects people truly get entangled with.

**authentic
thinking
and creative
minds
are at the heart
of the label**

Since 2011, **Muller Van Severen**, the design practice of Fien Muller and Hannes Van Severen, has been on an inspired quest for sculpturally interesting furniture objects – items that are spontaneous and produced with apparent effortlessness. The universe they create together dovetails quite naturally with their work as separate artists. Muller Van Severen is the first artist duo signed with valerie_objects. —

photo by Mirjam De vriendt

muller van severen

Accentuating the living space by adding a touch of playfulness and color to it, that is the basis of Muller Van Severen's work. Their furniture stands out for its visual lightness and simplicity.

With both Fien Muller and Hannes Van Severen being artists, it's natural that the collection sits somewhere between design and art. The design practice has been on an inspired quest for sculpturally interesting

furniture objects, without losing track of its functionality. "We create furniture with a certain lightness so the background becomes part of the image", they say.

Destroyers / Builders

is the Brussels based design studio founded by Linde Freya Tangelder in 2015. As the name suggests, she destroys design to rebuild her own visual language. By zooming in on basic architectural shapes and materials, and translating them into minimalist designs, she gives overlooked objects the attention they deserve. Tangelder is one of the founders of Belgium's highly appraised Brut collective that received the Henry van de Velde Award for Young Talent in 2019. Destroyers/Builders was also part of the FAR collection, a 'temporary collective' composed by Nina Yashar from the renowned Nilufar Gallery and Depot in Milan.

photo by destroyers / builders studio

destroyers / builders

Although the works of Linde Freya Tangelder, the woman behind the young and enigmatic destroyers/builders, balance on the fine line between art and design, it is yet a third discipline that continues to inspire her: architecture. For the furniture range for valerie_objects Tangelder remains faithful to her innate preference for curved shapes.

By zooming in on basic architectural shapes and materials, and translating them into minimalist designs, she gives the overlooked objects the attention they deserve. 'Contrasting high-end and low-end shapes, materials and textures is the leitmotiv through my work', Linde Freya says. The modular sofa 'assemble' is inspired by the shape of

small pebbles we as kids liked to collect or dash in the water, this coach sparks a feeling of nature, playfulness and joy. When it comes to the etage, both the rear surface and the shelves follow a particular curve which ensures the allure of a skeletal frame. The frame of an organic sculpture."

Robbrecht en Daem architecten was established in 1975 by Paul Robbrecht and Hilde Daem. The agency has created and completed a diverse range of projects. The interplay between architectural design and the visual arts is a unifying theme in their body of work. They designed structures for performing arts and music halls. Even their scientific-technical designs, like the laboratories, juxtapose constructions with contemporary art. Robbrecht en Daems architecture establishes a contemporary and humane position, with constructions making statements in a broad cultural context of science and art. Since 2002 Johannes Robbrecht joined the team, he is partner since 2012. Robbrecht en Daem architects is now an office with 35 employees —

photos by Johannes Robbrecht

robbrecht en daem architecten

In 2009, Robbrecht en Daem architects had an exhibition at Bozar with scenographic furniture. The expo was travelling to London and Johannesburg, so the architects came up with folding tables that make it

easier for visitors to look at drawings, sketches and texts. "This is micro-architecture. A folding table is invisible, but it can be unpacked and used immediately. For valerie_objects, the ta tisch table is finished in dark polished

massive wood or birch plywood in different coloured finishings.
